

Safety Bulletin

EA1N & EA2 Windfarm HDD and Duct Installation Works Offshore at Thorpeness

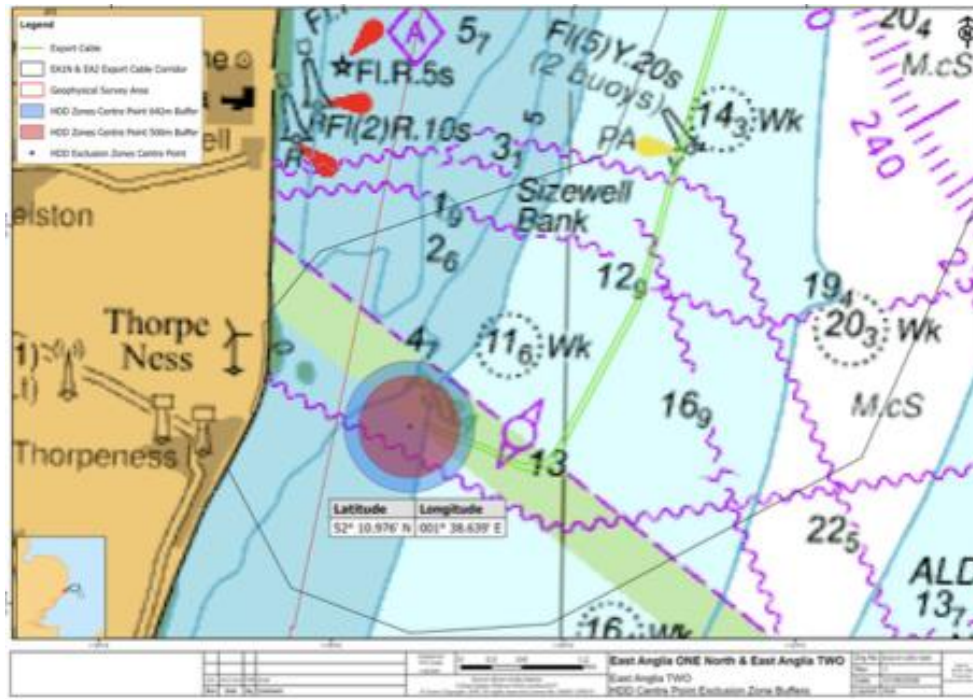

Mariners are advised that:

Horizontal Directional Drilling and Duct Installation work is ongoing for the EA1N and EA2 wind farm export cable pre-installation works and will continue for approximately the next twelve months.

The work comprises drilling and installation of 4 no. 800mm OD x 1800 metre ducts and will focus around the Haven Seachallenger, a Jack-Up Barge (JUB) located within a 500-metre exclusion zone centred on the co-ordinates below and will include associated survey and diving activity as well as Horizontal Directional Drilling (HDD) and duct installation work.

Latitude	Longitude
52° 10.976'N	001° 38.639' E

Centre Point of JUB Exclusion Zone:

Above chart extract shows 500 metre JUB Exclusion Zone

Mariners on passage north, or south along this coastline are strongly advised to pass offshore, to seaward of the JUB, due to a number of potential hazards inshore, including the drill and five large mooring buoys located approximately 100-150 metres inshore of the JUB, but within the 500m exclusion zone, as follows.

Mooring 1	52° 10. 97'N	001° 38.59'E
Mooring 2	52° 10. 97'N	001° 38.62'E
Mooring 3	52° 10. 96'N	001° 38.69'E
Mooring 4	52° 10. 87'N	001° 38.62'E
Mooring 5	52° 10. 90'N	001° 38.49'E

All mariners are requested to exercise additional vigilance and an effective lookout when transiting the area during this period of increased marine activity. The JUB and all vessels engaged in these works will abide by and display all shapes and lights required by the COLREGS and will monitor VHF Channels 12 and 16.

Please note that there will be a number of occasions when the exclusion zone will need be extended and these events will be subject to additional bulletins issued as required.
